Why Intelligence Agencies Choose Analysis Hub

Conduct in-depth analysis using the Intelligence Community's most trusted intelligence analysis tool.

Our industry-leading suite of modular products helps analysts transform data into decisions in near-real-time, uncover hidden connections with visual displays; turning overwhelming and disparate data into actionable intelligence. Key is our ability to put multi-dimensional visual analysis into the hands of users.

This gives the analyst the power to quickly pivot across the same data by applying the most meaningful view; whether that be association, temporal, geospatial, pattern, or combinational views to reveal new insights.

Used by **35,000+ users** in more than **140 countries**, i2 is the global leader in intelligence analysis and advanced analytics.

i2 has successfully supported national security and law enforcement analysts for **30 years**.

80% of national security organizations globally use i2.

Rely upon a dedicated team of experts with diverse backgrounds in the **IC, military, and law enforcement.**

Proven technology and capabilities

Two-way federated connection to internal and external data sources

Our federated data approach lets you connect to your data rather than pulling the entire source file. This provides analysts with the ability to enrich their intelligence analysis by connecting to external data feeds such as OSINT, dark web, and cyber threat intelligence.

Conduct intelligence analysis on any government network at any time

i2 is Defense Information Systems Agency RMF accredited on NIPRNET, SIPRNET, and JWICS and also on the Amazon AWS C2S Government Cloud.

Operators and intelligence collectors gain valuable insight in the field

Analysis Hub can be used without an internet connection on a standalone desktop while on an operations, allowing analysts to drive operations in real-time.

Visualize intelligence analysis geospatially with Esri data

Easily integrate with Esri to visualize intelligence on a map, conduct pattern of life (POL) analysis, and more.

Simple licensing model and scalability

Flexible deployment strategies to minimize costs and lag time

Owner operated with no need for long term consultations or a supported deployment. Once deployed, i2 offers low maintenance fees, unlike our competitors.

No-hassle scalability frees up future budget dollars

As you scale, you pay by the user and not for increases in data. This means you can continue to add intelligence data without fear of cost overruns.

Schematize and ingest all of your data without having to hand it over to a private company

Your data, your analysis, your intelligence - always. You keep your data and you can be assured we will not store it.

No-surprise simple licensing

Our user-based licensing model is proven to be lower cost than our competitors. There are no hidden charges for data ingestion or connection to internal databases.
