i2 Analyst's Notebook Fundamentals 1

If you are new to i2 Analyst's Notebook or looking to refresh your skills, this session will provide an understanding of the foundational elements of this powerful, investigative analysis tool to uncover hidden connections and patterns in data.

What You'll Learn

Understand the basics of link analysis, to include the types of entities, links, and attributes available to manually create different types of charts and tell the story of your investigation. Learn how you can perform internal search and navigation functions to find, filter, and analyze information both visible and hidden on your chart.

i2 Analyst's Notebook Fundamentals 2

If you are new to i2 Analyst's Notebook or looking to refresh your skills, this session provides an understanding of the foundational elements of this powerful, investigative analysis tool to uncover hidden connections and patterns in data.

What You'll Learn

Learn how to quickly and easily automate the import of information into your chart as well as create import specifications for analysis charts to be used in future investigations or share with your fellow analysts. Additionally, we will cover additional tools to start your analysis and find the answers hidden in your data, then prepare your charts for presentation and dissemination through differing mediums.

i2 Analyst's Notebook Intermediate 1

Building on the foundation established in the i2 Analyst's Notebook fundamentals sessions, this intermediate-level course unlocks i2 Analyst's Notebook's advanced analytical capabilities. Deepen your knowledge in data visualiaztion, network analysis, and link analysis to take your complex investigations to the next level.

What You'll Learn

Learn how you can use tools such as List Items, Analysis Attributes, and Social Network Analysis to find hidden connections and further develop your understanding of an existing network and how it operates. Learn who controls the information flow, how entities interact, and differing methods to visualize connections in your networks.

i2 Analyst's Notebook Intermediate 2

Building on the foundation established in the i2 Analyst's Notebook fundamentals courses, this intermediate-level course unlocks i2 Analyst's Notebook's advanced analytical capabilities. Deepen your knowledge in data visualization, network analysis, and link analysis to take your complex investigations to the next level.

What You'll Learn

In this session, you will learn how to automate the formatting of multiple chart items based on set criteria to highlight or visualize your data based on the needs of your investigation. In addition, learn how to import data to create a timeline and visualize a sequence of events and start finding patterns in your data, then see how you can prepare and present your findings.

CONNECTED i2

User and Training Conference
NORTH AMERICA 2024

From Call Data Records to Actionable Intelligence: Unleashing the Power of Analyst's Notebook for Deeper Insights

Attend this session to master the art of transforming call data records into actionable intelligence. Learn to wield i2 Analyst's Notebook to uncover hidden connections, identify key players, and reconstruct critical timelines.

What You'll Learn

Learn how you can utilize the power of i2 Analyst's Notebook to derive insights into call record data through imports and analysis tools such as bar charts and histograms to gain a full understanding of the patterns of activity and relationships in your data.

Show me the Money: Unlock Financial Insights with i2 Analyst's Notebook

Join this session to become a fraud-fighting specialst. Master the art of data visualization, link analysis, and pattern recognition to uncover hidden connections, identify fraudulent schemes, and trace illicit funds. Leverage the power of i2 Analyst's Notebook to transform complex financial data into actionable intelligence, leaving no stone unturned in your investigation.

What You'll Learn

Utilize the analytical power of i2 Analyst's Notebook to conduct a fraud investigation specifically focused on the transfer and movement of money from one bad actor to another. In this training, you will learn how to import banking data, find previously unknown connections, and analyze then present your findings.

Enable new insights by exploiting unstructured data to enhance and expedite your analysis

Data analysts and investigators are skilled at processing structured data from sources such as databases and spreadsheets. However, exacting information from unstructured data is a much more challenging and time-consuming process. Important details can easily be overlooked and key connections are difficult to track across multiple unstructured documents. In this session you will learn how to leverage i2 TextChart to process these vast resources to exploit intelligence from this valuable source of data.

What You'll Learn

- Receive hands-on experience using the features of i2 TextChart with i2 Analyst's Notebook.

- Process documents through i2 TextChart and learn how to interpret the results in the TextChart document viewer.

- How to tag and remove entities and links in the processed documents when needed.

- How to build complex charts with the extracted entities and links and explore and vet the results.

Connected i2: Unleash the power of data in your investigations

Drowning in data? Buried beneath mountains of information? Uncover non-obvious connections hiding in disparate data sources with this session. Learn to leverage i2 to connect to, search, and visually analyze a variety of data sources.

What You'll Learn

- Connect to and search external data on demand.

- Correlate, match, de-duplicate, and merge data in the repository.

- Advanced searching and visual queries to help uncover connections and patterns across data sources.
