

# Audit Trail Appliance (ATA)

[i2group.com/solutions/group/ata](https://i2group.com/solutions/group/ata)

## A powerful protective monitoring and assurance platform, proven under the stringent trust, security and evidential requirements of professional standards and policing.

ATA provides a secure and reliable digital footprint, with powerful search, alerting and risk scoring across activity and communications on work devices. This enables early risk identification, appropriate response, and confident, evidence-based decision-making to protect both people and the organisation.

### What ATA is...

- ✓ A proactive, protective monitoring and assurance platform, built for the demands of high trust, secure and evidential environments.
- ✓ Provides a secure digital footprint of activity and communications across work devices.
- ✓ Enables real-time identification of high-risk behaviour while supporting proportionate, policy-aligned use.
- ✓ Deployed as a locked-down appliance on-prem or in an accredited cloud environment, ensuring evidential robustness.
- ✓ Proven scalability and durability across large and demanding environments.

**i2 GROUP**

### Expertise, expanded

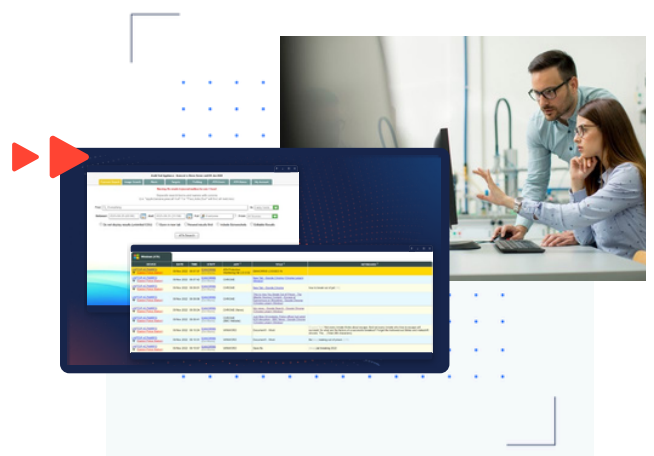

i2 Group unifies leading innovators and specialist expertise in intelligence and investigation solutions, empowering organisations to make informed decisions that help protect people and communities.

**Corporate IT Systems** is a specialist in protective monitoring and assurance, trusted to deliver secure, evidential solutions for organisations operating in high-risk, high-trust environments.

### A safeguard for agencies

Proven in policing and adaptable to any high-trust environment, we understand that preserving integrity and safeguarding people, data and systems is mission-critical.

Public confidence matters, and organisations must be able to deter and detect misconduct to demonstrate fairness, transparency and professionalism. We also recognise that unethical or unlawful behaviour, if left unchecked, can damage reputation, erode trust and expose organisations to regulatory, legal and operational risk.

## Key capabilities

Configurable activity capture.

High volume data handling.

Search and investigation tools.

Profiling and risk scoring.

Real-time alerts.

Full audit and compliance.

Reporting and analytics.

Exporting into i2 Analyst's Notebook.

## Lawful business monitoring

Proportionate, lawful business monitoring that is configurable to capture specific technologies, activities and events.

Supporting trust, transparency and accountability while respecting organisational policy.

Microsoft Office 365

## Why ATA wins

- ✓ Delivers proactive, holistic monitoring, going beyond reactive or target-only collection models.
- ✓ Identifies behaviours and risks that traditional monitoring tools routinely miss.
- ✓ Dramatically reduces investigation time through fast access to evidential activity.
- ✓ Provided as a fully managed, complete solution with minimal dependency on in-house IT teams.
- ✓ Supported by dedicated, highly specialised product and support teams.
- ✓ Engineered to PSD-grade integrity standards, making it fit for any sensitive, high trust environment.
