Highlights

Leading Monitoring Solution

Experts in providing audit solutions to Public Sector, Law Enforcement and large organisations.

Real-time Monitoring

Real-time monitoring and alerts with keyword detection, screen captures, GPS tracking, and instant search to support active investigations.

Delivering Confidence and Assurance

Fast and effective, find any user activity, in almost any system, providing piece of mind.

Managed Service

Our solution is supported and maintained by i2® Guardian, with a dedicated technical team.

Audit Trail Appliance (ATA) records all activity at the organizational level, with data securely stored and easily searchable by non-IT personnel.

How it works

Real-time alerts for proactive investigations

Audit Trail Appliance (ATA) goes beyond retrospective auditing with real-time alerts and monitoring to support active investigations. Features like keyword alerts, screen captures, GPS tracking, and instant text search help detect and address misconduct quickly.

The benchmark in protective monitoring

Positioned as a benchmark in protective monitoring, Audit Trail Appliance (ATA) serves as a digital “black box,” capturing keystrokes, emails, calls, and location data, all stored securely and accessible only to authorized personnel. Tamper-proof storage and strong encryption (AES and TLS) ensure audit trail integrity, while automated remote backups safeguard data against hardware failure.

Scalable, Secure and Comprehensive

Audit Trail Appliance (ATA) offers a scalable and maintenance-free solution, especially suitable for large organizations with units covering 20,000+ staff. The system also allows you to import data from your existing Audit systems, providing a unified and comprehensive monitoring view. Despite its thorough coverage, the system is designed with a strong emphasis on safeguarding employee privacy. Delivered as a tamper-proof solution, making it a secure and cost-effective option for comprehensive business monitoring.

A safeguard for Law Enforcement Agencies

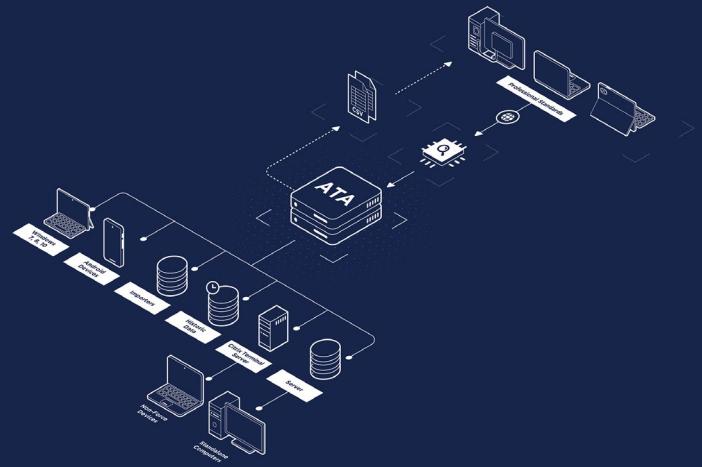

We already work with majority of the UK Police Forces, so we understand that preserving integrity and safeguarding officers is critical to any Police Department.

Public trust is essential, and departments must deter and detect the small number of officers or civilians who engage in misconduct to demonstrate fairness, transparency, and professionalism. We also recognize that questionable or illegal conduct can damage reputation and expose departments to scrutiny and liability.

How Audit Trail Appliance (ATA) helps

- ✓ To protect Law Enforcement Officers from false allegations and distressing disciplinary or litigation processes.
- ✓ To help Law Enforcement Agencies with early identification of worrying behaviour.
- ✓ To help eradicate insider threat.
- ✓ To identify staff misconduct and exploitation of vulnerable people and communities.

How it works

Be free from insider threat, fraud and corruption with i2 Guardian's Audit Trail Appliance.
